DETAILED ACTION

1. Claims 1-12 are allowed.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Eliot Malamud on 2/12/09.

The application has been amended as follows:

1. (Currently Amended) A system for user authentication using infrared communication of a mobile terminal, comprising:

a mobile terminal configured to generate electronic signature data for a user who requests a particular service in the form of an infrared signal ~~with a view~~ to performing a step of user authentication;

automated information providing means for verifying the electronic signature data provided by the mobile terminal and for allowing the requested service depending on the verification result; and

certificate providing means for registering a certificate in response to a request for issuance of the certificate by the mobile terminal and for transmitting the certificate to the

automated information providing means through a communication network ~~with a view to~~ verifying the validity of user authentication;

wherein the mobile terminal includes:

a certificate issuance processing module configured to generate a private and public key pair to allow the certificate providing means to issue the certificate; and

a security service module for providing security service for issuance of the certificate and processing of the electronic signature data.

7. (Currently Amended) A method for user authentication using infrared communication of a mobile terminal, comprising:

a first step at which a mobile terminal generates a PKI-based cryptographic public and private key pair for allowing a certificate providing means to generate and transmit an authorization certificate to the mobile terminal;

a second step at which the mobile terminal sends a request for a particular service to an automated information providing means;

a third step, responsive to a request for electronic signature data from the automated information providing means, of transmitting electronic signature data created by the mobile terminal to the automated information providing means by way of infrared communication;

a fourth step, conducted by the automated information providing means, of obtaining a certificate registered by the mobile terminal from certificate providing means through a communication network;

a fifth step, conducted by the automated information providing means, of performing user authentication by verifying the validity of the certificate and the electronic signature data; and
a sixth step of allowing the requested service if the user authentication is successful.

3. The following is an examiner's statement of reasons for allowance: The closest prior art of record (Forrest) discloses infrared communication between a mobile terminal and an automated information providing means (ATM) and secure communication is established through certificate verification using infrared communication. However, the prior art of record individually or in combination does not explicitly disclose the mobile terminal is configured to generate a public and private key pair to allow the certificate providing means to issue the certificate, and the certificate providing means for registering a certificate in response to a request for issuance of the certificate by the mobile terminal and for transmitting the certificate to the automated information providing means through a communication network to verify the validity of the user authentication in light of other features disclosed in claims 1 and 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SHIN-HON CHEN whose telephone number is (571)272-3789. The examiner can normally be reached on Monday through Friday 8:30am to 5:30pm.
